SUMMARY

I am a **Software Engineer** with **3+ years of experience** in **full-stack web development**. Most of that time has gone into building SaaS products from the first line of code and then keeping them running in production for real, paying users.

I work mainly with **PHP, Laravel, JavaScript/TypeScript, React, TailwindCSS, and WordPress**. I usually handle a feature from start to finish, from the database schema and API to the UI and cloud deployment, and I care about shipping quickly without leaving messy code behind.

I got into programming through competitive problem-solving and have solved over **1,000 problems** on online judges such as Codeforces, LightOJ, and LeetCode (github.com/mt-shihab26/problem_library). I have also contributed fixes and features to Laravel's open source repositories, and I like learning new tools by building small projects with them.

EXPERIENCE

Finnext

Software Engineer (Contract)

May 2023 – Present · 3 yr 6 mo

- Built paystubhero.com as the only developer, working with one designer. The platform generates 5,000+ financial documents a month, and I have maintained it since launch in 2023.
- Built practicescope.com, an AI-powered platform for dental practice acquisitions that benchmarks 30+ financial metrics and generates personalized acquisition reports.
- Handled features from start to finish, from database design and API development to the React UI and cloud deployment.
- Built and maintained custom WordPress plugins and client websites.

PHP, Laravel, WordPress, JS/TS, React, Inertia.js, TailwindCSS, shadcn/ui, Go, PocketBase

Systech Digital LTD

Software Engineer Intern (Diploma Industrial Attachment)

Jun 2024 – Sep 2024 · 4 mo

- Designed and built a custom web application in PHP using the MVC pattern.
- Built a full-stack e-commerce platform with Laravel, including an admin panel for managing products and orders.

PHP, Laravel, TailwindCSS, MySQL

PROJECTS

PRODUCTION SAAS PRODUCTS

PaystubHero (paystubhero.com)

A SaaS application that generates paystubs, W-2 forms, 1099-MISC, 1099-NEC, and other financial documents. Documents are rendered to PDF with mPDF, and payments go through Stripe.

Laravel · React · PHP · TypeScript · Inertia.js · TailwindCSS · shadcn/ui · Stripe · mPDF

PracticeScope (practicescope.com)

An AI-powered SaaS platform for dentists who are evaluating a practice to buy. Users upload a P&L or tax return, AI extracts the figures, and the app sells a personalized acquisition report through Stripe.

React · PocketBase · Go · TypeScript · TailwindCSS · shadcn/ui · Stripe

Quick Doctor's Note (quickdoctorsnote.com)

OPEN SOURCE CONTRIBUTIONS

laravel/ai
github.com/laravel/ai

#177 Added make:agent-middleware artisan command

#234 Fixed middleware stub naming conflict

laravel/installer
github.com/laravel/installer

#460 Replaced deprecated add() with addCommand() from Symfony Console

#469 Fixed absolute path handling on Linux/Unix systems

laravel/docs
github.com/laravel/docs

#11068 Added documentation for the make:agent-middleware artisan command

laravel/breeze
github.com/laravel/breeze

#444 Removed unnecessary Tailwind config files on the API stack

SKILLS

Languages

JS/TS (Advanced, 4 yrs)
PHP (Advanced, 3 yrs)
C/C++ (Intermediate)
Go (Basic)

Frameworks

React (Advanced, 3 yrs)
Laravel (Advanced, 3 yrs)
Inertia.js (Advanced, 3 yrs)
TailwindCSS (Advanced, 3 yrs)
shadcn/ui (Advanced, 2 yrs)
WordPress (Intermediate)

A SaaS application that walks users through a step-by-step process to generate customizable medical notes. It uses Stripe for payments and mPDF to produce the final PDF.

PHP · TypeScript · Laravel · React · Inertia.js · TailwindCSS · shadcn/ui · Stripe · mPDF

SIDE PROJECTS

Digestly (digestly.developershihab.com)

github.com/mt-shihab26/digestly

A newsletter/RSS digest app that lets users subscribe to feeds and receive a daily email digest, built with Laravel & React.

Laravel · React · PHP · TypeScript · TailwindCSS

Rawdo (rawdo.developershihab.com)

github.com/mt-shihab26/rawdo

A task management application built from scratch in plain PHP and structured like a small PHP framework, with its own routing, dependency-injection container, database/model layer, validation, and session-based authentication.

PHP · TailwindCSS

Strokr (strokr.developershihab.com)

github.com/mt-shihab26/strokr

A keyboard-first typing speed trainer. It gives per-character feedback as you type, charts WPM and accuracy after each test, and keeps a history of past tests.

React · TypeScript · TanStack Start · TailwindCSS · GSAP · Drizzle ORM

Runnr (runnr.developershihab.com)

github.com/mt-shihab26/runnr

A 3D endless runner game written in C with raylib. Obstacles come from a recycled object pool, and the game is compiled to WebAssembly with Emscripten so it can be played in the browser.

C · raylib · WebAssembly · Emscripten

OPEN SOURCE TOOLS & PLUGINS

Orivo

github.com/mt-shihab26/orivo

A desktop Pomodoro timer I built for myself and use every day, written in Go with raylib. It syncs todos with Todoist and logs daily work sessions back to each task.

Go · raylib · Todoist API

Quick Redirect Manager

github.com/mt-shihab26/quick-redirect-manager

A small WordPress plugin for managing URL redirects, used in production on paystubhero.com. It stores them in WordPress's native options table, so it needs no extra database tables.

PHP · WordPress · Plugin

Node.js (Intermediate)
PocketBase (Basic)
raylib (Basic)

Others

MySQL (Intermediate)
Linux (Intermediate)
Git (Intermediate)
Neovim (Intermediate)
Stripe (Basic)
OpenAI API (Basic)
Facebook API (Basic)

EDUCATION

Bangladesh University of Business and Technology (BUBT)

B.Sc in Computer Science and Engineering
May 2025 – Present · 1 yr 6 mo

- Studying alongside my software engineering work at Finnext
- Continuing from my Diploma in Computer Science

Faridpur Polytechnic Institute

Diploma in Engineering, Computer Science
Dec 2021 – Aug 2025 · 3 yr 9 mo

- Took part in competitive programming contests at the institute
- Active member of the competitive programming community
